9.9 ARRANGEMENT OF RECORDS

Different systems may be adopted depending on the purpose of the records and on the merits of a system. The records could be arranged:

- Alphabetically
- Numerically
- Geographically and
- With Index card

- Alphabetical Type
  It can be done in 2 orders
  - Dictionary order (aa,ab,ac,ad,ae,af-……az and ba,bb,bc,bd,be,bf, ……bz)
  - Encyclopaedic order
- Numerically
  It can be done in two ways
  - Serial number
  - Digit filing
- Geographically
  Information is arranged alphabetically by geographical area or the place name.
- With Index cards
  - An index card consists of heavy paper cut to a standard size, used for recording and storing small amounts of discrete data. It was invented by Carl Linnaeus, around 1760.
  - Eg: - forms, case records and registers.

9.10 REPORTS

Introduction

Reports are information about a patient either written or oral. It takes place when two or more people share information about patient care, either face to face or by telephone.
