11. Remove the sheet up to the waist, ask the patients and keep the arms above his head. It will be easy to clean the axillae in this position. Clean chest and abdomen.
12. Change water and turn the patient to the side and sponge his back. Give long firm strokes from back of neck to the buttocks. Watch for any redness over the pressure areas.
13. Do the left leg first and then the right. Have the patient's knee flexed so to facilitate washing. Give the bed pan and ask the patient to clean the genitals. If the patient is unable to do help to do it for him. Patient should be given privacy during this.
14. This back care is done applying alcohol, massage back,use long firm strokes starting from back of the neck out over the shoulders and down to the buttocks. Use also rotation motion to increase the blood circulation. Extra attention to be given to the pressure areas.
15. Apply powder if indicated. This depends upon the condition of the skin. If the skin is wrinked the application of oils/ creams is advisable.
16. If the patients is having dribbling of urine, zinc cream is applied.
17. Role up the mackintosh and sheet when the patient is on the side. Then remove it from the other side. Put the soiled linen in the receptacle (bucket for soiled linen).
18. Dress up the patient and remove the top sheet.
19. The bed is kept tidy and dry.
20. The patient is given a warm drink.
21. Remove the articles from the bed side.
22. Clean and replace in respective places.
23. Send soiled linen for wash.

2.5 BACK CARE

Purpose

1. To cleanse the skin and back
2. To stimulate circulation
3. To refresh the patient by relieving fatigue and discomfort
4. To prevent bed sore

Articles Required:

1. Basin of warm water
2. Soap wash cloth and towel
3. Back rub lotion or spirit
4. Talcum powder

Procedure:

Bring the tray to the bedside, and screen the bed. Explain to the patient, get him into position, and protect the bed with the towel, wash the part, then leaving it wet, soap the palm of the hand well and massage with circular movements. So that the tissues under the skin are moved and the circulation is stimulated.
