2.7 NAIL CARE

Purpose:

- Maintain skin integrity around nails
- Provide for clients comfort and sense of well being
- Maintain foot function
- Encourage self-care

Articles Required:

- Water proof pad
- Wash cloth, towel
- Wash basin, warm water, soap
- Lotion
- Disposable gloves
- Nail clippers, file
- Polish remover (if necessary)

Procedure:

1. Wash your hands
2. Help client to sit if possible. Elevate head of bed for bedridden client.
3. Remove colored nail polish if client is scheduled for surgery.
4. Fill washbasin with warm water [100-104oF], place water proof pad under basin.
5. Soak client's hands or feet in basin for 10-20 Minutes.
6. Dry the hand or foot that has been soaking. Rewarm water, and allow other extremity to soak while you work on the softened nails.
7. Gently clean under nails.
8. Beginning with large toe or thumb, clip nail straight across
9. Push cuticle back gently.
10. Repeat procedure with other nails
11. Rinse foot or hand in warm water.
12. Dry thoroughly with towel, especially between digits
13. Apply lotion to hands or feet
14. Help client to comfortable position
15. Remove and dispose of equipment.
16. Wash your hands.
