7.4 BONES OF THE BODY

- Bones of the body 206
  - Skull (22)
    - Cranium (8)
      - 1 – Frontal bone
      - 2 – Temporal bone
      - 2 – parietal bone
      - 1 – Occipital bone
      - 1 – Ethomoid
      - 1 – Sphenoid
    - Face bones (14)
      - Lacrimal bone – 2
      - Nasal bone – 2
      - Cheek bone – 2
      - Curled bone – 2
      - Palate – 2
      - Upper jaw bone – 2
      - Lower jaw bone – 1
      - Vomer – 1
  - Thorax or chest bone (25)
    - Sternum (breast bone)
    - Ribs – 24
  - Spine
    - (Vertebral column) (33)
    - Cervical vertebrae – 7
    - Thoracic vertebrae – 12
    - Lumbar vertebrae – 5
    - Sacral vertebrae – 5
    - Coccyx – 4
  - Upper limb (64)
    - (32+32)
    - Clavicle – 1
    - (Collarbone)
    - Scapula –1
    - (Shoulder bone)
    - humerus – 1
    - Radius – 1
    - Ulna – 1
    - Carpals – 8
    - Metacarpals – 5
    - Phalanges – 14
  - Lower limb (62)
    - (31+31)
    - Hip bone – 1
    - Femur – 1
    - Patella – 1
    - Tibia – 1
    - Fibula – 1
    - Tarsals – 7
    - Metatarsals – 14
    - Phalanges – 14

It consists of outer "Compact bone" and inner "Spongy" bone.

7.5 SKULL

The skull consists of 2 parts

1. The cranium is made up of eight bones
2. The facial skeleton is made up of 14 bones

Cranial bones

a. Frontal bone – 1	Which forms the forehead and helps to protect the eyes.
b. Parietal bone – 2	One on each side of the top of the skull, joined into the middle.
c. Temporal bone – 2	One an each side below the parietal bones. These protect the inner parts of the ears.
d. Occipital bone – 1	Which forms the back and base of the skull. It has a large hole on its base called the foramen magnum, for the spinal cord to pass through
e. Sphenoid bone – 1	A hat shaped bone.
f. Ethmoid bone – 1	Which form the roof of the nose between the eyes.
