of basic principles of psychology is significant in taking care of nurse herself and also in her interaction with the patient. The father of psychology is German philosopher Wilhelm Wundt (1832 - 1920)

- "**Sociology**" is a branch of science which deals with society, including patterns of social relationships, social interaction, and culture.

The nurses should understand that, psychology and sociology are sciences which must be incorporated in nursing.

In this chapter, we are going to discuss about the psychology in terms of behavior and what is the relationship between nurse and patients behavior? How to keep healthy behavior? What is social relationship? society, social structure etc.

Wilhelm Wundt

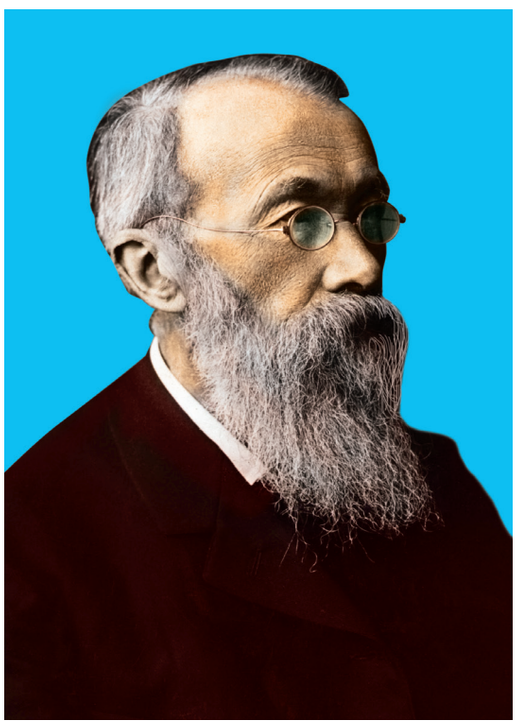

- Leipzig, Germany

-The "father of Psychology"

-Founder of modern Psychology

-Opened the first Psychology lab in 1879

-Applied laboratory techniques to study of the mind

Wilhelm Wundt
(1832 - 1920)

3.2 DEFINITIONS

3.2.1 Psychology

- **Psychology means**, scientific study of the way the human mind works and how it influences behavior
- "Psychology: the study of behavior and mental processes and how they are affected by an organism's physical state, mental state, and environment.
- Psychology is a science, which aims to give us better understanding and control of the behavior of the organism as a whole. (William McDoughall-1949)
