- Sociology gives knowledge to deal with patient and to understand his habits norms, culture and behavior etc.. The nurse has to understand the necessity of changing the environment or surrounding.
- The sociological knowledge will help the nurse to understand the factors of caste, faith, community, religion etc. Without a sociological knowledge a nurse cannot understand the community.
- Adjustment and services of the family members are important in the recovery process of the patient. So this knowledge of family is essential for the nurse.
- Sociological knowledge helps her to avoid prejudices and discrimination.
- A nurse should understand the social position, status and social responsibilities with regard to health field by studying sociology.
- She has to work in accordance with rules and norms of it by removing egoistic and impulse based behavior.
- It helps the nurse to approach the patient at various levels. – Emotional level – Cultural level – Intellectual level.

"NURSES ARE IN A UNIQUE POSITION THAT ALLOWS THEM TO INTEGRATE ALL ASPECTS OF PATIENT CARE, ENSURING THAT CONCERNS ARE ADDRESSED, STANDARDS ARE UPHELD AND POSITIVE OUTCOMES REMAIN THE GOAL"

- Social correlates of disease including demographic factors can be understood by the nurse with the knowledge of Sociology.

  The example for Intervention measures: In the absence of social worker the Nurse may have to deal with family and other problems such as housing, finance, social, isolation and psychological disturbances of the patient.

3.11.4 Basic principles of sociology

These are the basic principles of sociology:

1. People behave differently in groups than they do as individuals.
2. People obey rules that are socially constructed.
3. People socially construct the rules.
4. There are rewards for following the rules and penalties for breaking the rules.
5. The rules of society can be studied scientifically.
6. Societies are organized into distinct social units (e.g. family, government, education, and religion) that tell us what the rules are.
7. Our patterns of behavior reveal unequal social relationships.
8. Social change is a necessary and essential part of our survival.
9. We must attempt to explain our social behavior.
10. We must strive to provide evidence that supports our claims about social behavior.
