production and population. A strong cultural foundation was laid across India during this period, which finally culminated in the Early Historic period. The extensive foundations for the village settlements of India were laid during this period.

Literature of the Vedic Age

The Vedas (*Vid* = to know, *Vidya*) are one of the earliest known texts to have been composed in India. The language of the Vedas is described as Vedic Sanskrit. The Vedas are four: *Rig* is the oldest, and the others being *Yajur*, *Sama* and *Atharva*. The Vedic texts were memorized and orally transmitted by Brahmins from generation to generation. They were written down in the later period, after the introduction of writing. The earliest known written manuscripts of the Vedas date to the 10-11th century CE. They contain information about the polity, society, religion and philosophy, and hence they are a source for writing history.

The main collections of Vedic hymns are called *samhitas*. The *Rig Vedic-samhita* is the earliest text. The *Rig Veda* is dated to between 1500 and 1000 BCE. The *Rig Veda* contains 10 books. Books 2 to 7 are the earliest and the Books 1, 8, 9 and 10 are assigned to a later period.

Samhitas are ritualistic texts, and they explain the social and religious importance of rituals. Each *samhita* has added texts called *brahmanas*, which have commentaries on the hymns and rituals. Each *brahmana* has an *aranyaka* (forest text) and an *upanishad*. The *aranyakas* contain mystical ritual instructions to be undertaken in secret by the sages who live in the forests. *Upanishads* deal with philosophical enquiries.

The *Yajur*, *Sama* and *Atharva Vedas* are dated to a slightly later period. The *samhitas* of the *Sama*, *Yajur* and *Atharva Vedas*, and the *brahmanas*, *aranyakas* and *upanishads* attached to the Vedas are the Late Vedic texts. The *Sama Veda* was composed in musical notes. The *Yajur Veda* has rituals and hymns. The *Atharva Veda* contains charms and magical spells.

Zend Avesta

The *Zend Avesta* is a Persian/Iranian text of Zoroastrianism. This book speaks about the lands and gods of the people speaking the Indo-Iranian languages. It has references to the regions of northern and north-western parts of India. It has terms which show linguistic similarity with the Vedas. This text is an indirect evidence that the early home of the Aryans was outside the Indian subcontinent.

2.1 Pre-Aryan, Late Harappan and Chalcolithic Cultures of India

The Pre-Harappan cultures are the earliest Chalcolithic cultures of India, and they are found in the time before the beginning of the mature phase of the Harappan culture, and continued to exist in the later period. The other Chalcolithic cultures of India are more or less contemporary to this phase of Harappan culture and they continued even after its decline. Unlike the mature urban phase of the Harappan civilization, Chalcolithic cultures were pastoral and based on farming, generally rural in nature. They used copper and stone blades and pottery and also low grade iron in the later period. Their settlements were sedentary or semi-sedentary. In the north-western and western regions of India, the early farming cultures are associated with the Chalcolithic cultures rather than the Neolithic cultures.

The Chalcolithic people also began to domesticate animals in addition to agriculture. They had cattle, sheep, pigs and goats and buffaloes. Evidence has been found of turtles and fowls in their settlements. The houses were made of stone, mud bricks, mud and perishable wooden materials, and built on a stone foundation. The walls were made with bamboo frames. Silos (well prepared pits) meant for storage of grains have also been found. People used black and red ware and black on red ware pottery.
