Introduction

By the first quarter of the nineteenth century, India had produced a small English-educated intelligentsia, closely associated with British administration or British trade. The ideas and the work of the Christian missionaries had already begun to have its impact. Bengal was the first province to be affected by the British influence and so it was here that several ideas of reform originated. British administration, English education, and European literature brought to India a new wave of thoughts that challenged traditional knowledge. Rationalism as the basis for ethical thinking, the idea of human progress and evolution, the concept of natural rights associated with the Enlightenment, were the new ideas which led to what has been termed as Indian Renaissance. The spread of printing technology played a crucial role in the diffusion of ideas.

19.1 Emergence of Reform Movements

The British characterized Indian society in the nineteenth century as being caught in a vicious circle of superstitions and obscurantism. In their view idolatry and polytheism reinforced orthodoxy impelling the people to follow them blindly. The social conditions were equally depressing. And the condition of women was deplorable. The practice of sati came in for particular condemnation. The division of society according to birth resulting in the caste system was also criticized. Most importantly, the British argued that without their intervention there was no possibility of deliverance from these evils for Indians. Needless to say, this was a self-serving argument, articulated by missionaries and Utilitarians to justify British rule.

Utilitarians: believers in the doctrine of greatest happiness of the greatest number

India was a much bigger, more complex and diverse country in the early nineteenth century. Conditions varied vastly across it. The social and cultural evils had been fought by Indian reformers through the ages. But the advent of the British with their Enlightenment ideas undoubtedly posed a new challenge. This chapter looks at how social reform movements emerged in various parts of the country.
