Definition of Social Responsibility

The following are some important definitions of social responsibility

"Social Responsibility refers to the obligation to pursue those policies to make those decisions or to follow those lines of action which are desirable in terms of objectives and values of our society."

– Howard R.

"Social Responsibility requires managers to consider whether their action is likely to promote the public good, to advance the basic beliefs of our society, to contribute to its stability, strength and harmony".

Peter F. Drucker

17.02 Need for Social Responsibility

Business is expected to be responsible to society due to the following reasons

1. Self-Interest

A business unit can sustain in the market for a longer period only by assuming some social obligations. Normally businessmen recognise that they can succeed better by fulfilling the demands and aspirations of society. People who have had a higher standard of living and have been exposed to an environment conducive to healthy growth make better employees and customers for business than those who are poor, ignorant and oppressed. For example, provision of higher wages and good working conditions motivates workers to work hard and produce more. Labour turnover and absenteeism are reduced.

2. Creation of Society

Business is a creation of society and uses the resources of society. Therefore, it should fulfil its obligations to society. Businessmen should respond to the demands of society and should utilise the social resources for the benefit of the people at large. In the long run a successful business can be built on the foundations of a happy community and a satisfied work force.

3. Social Power

Businessmen have considerable social power. Their decisions and actions affect the lives and fortunes of the society. They collectively determine for the nation such important matters as level of employment, rate of economic progress and distribution of income among various groups. Businessmen should assume social obligations commensurate with their social power. The government controls and regulations intervene in the social power of business in the absence of business taking up social responsibility. It is, therefore, the moral and right thing for business enterprises to assume social obligations.

4. Image in the Society

A business can improve its image in public by assuming social obligations. Good relations with workers, consumers and suppliers help in the success of business. Social obligations improve the confidence and faith of people in a business enterprise.

5. Public Awareness

Now-a-days consumers and workers are well informed about their rights. Consumers expect better quality products at reasonable prices. Similarly, workers desire fair wages
