Multiple choice questions

1. Which of the following is a reasonable representation of phylogenetic diversity?
   a. The Chain of Being
   b. The Ladder of Life
   c. The 5-Kingdom Tree
   d. The 3-Domain Tree
2. Microorganisms belonging to the same are expected to have the most characteristics in common with eachother.
   a. Order
   b. Species
   c. Family
   d. Kingdom
3. What was the first and most useful microscopic tests for classifying bacteria?
   a. Gramstain
   b. Flagellar stain
   c. Simple stain
   d. Capsular stain
4. Which of the following is the arrangement of organisum into groups or taxa?
   a. Nomenclature
   b. Identification
   c. Systematics
   d. Classification
5. Binomial nomenclature means writing the name of microorganism in two words is
   a. Order and family
   b. Family and genus
   c. Species and variety
   d. Genus and species

Answer the following

1. Define: Taxonomy and what is the here inter related parts of taxonomy?
2. Define: Classification, Nomenclature and Identification.
3. What is meant by binomial system?
4. Who developed the Bionomial system in the year?
5. What is taxonomic rank and why are we using this?
6. What is the difference between biovars, serovars and morphovars?
7. What is type strain and why it is called as type strain?
8. Write down the techniques which are used to identify the taxonomic characters of an organism?
9. Explain in detail about the molecular characteristics which are used to identify the taxonomic orders?
10. What are the five kingdom classifications?
