Upper respiratory system		
Diseases	**Pathogen**	**Symptoms**
Bacterial diseases		
Epigottitis	*Haemophilus influenzae*	Inflammation of the epiglottis
Streptococcal pharyngitis (strep throat)	*Streptococci*, especially *Streptococcus pyogenes*	Inflamed mucous membranes of the throat;
Diphtheria	*Corynebacterium diphtheriae*	Bacterial exotoxin interferes with protein synthesis; damages heart, kidney, and other organs; membrane forms in throat; cutaneous form also occurs;
Otitis media	Several agents, especially *Staphylococcus aureus, Streptococcus pneumonia* and *Haemophilus influenza*	Accumulations of pus in middle ear build up painful pressure on eardrum
Viral diseases		
Common cold	Rhino virus	Familiar symptoms of coughing, sneezing, running nose.
Lower respiratory system		
Bacterial diseases		
Pertussis (whooping cough)	*Bordetella pertussis*	Cilia in upper respiratory tract inactivated, mucus accumulates, spasms of intense coughing to clear mucus;
Tuberculosis	*Mycobacterium tuberculosis*	Tubercle bacilli entering lungs survive phagocytosis, reproduce in macrophages; tubercles formed to isolate pathogen; defenses eventually fail, and infection becomes systemic;
Viral diseases		
Respiratory syncytial virus (RSV)	Respiratory syncytial virus	A serious respiratory disease of infants;
Fungal diseases		
Blastomycosis	*Blastomyces dermatitidis*	Abscesses; extensive tissue damage;
Bacterial pneumonia		
Pneumococcal pneumonia	*Streptococcus pneumonia*	Infected alveoli of lung fill with fluids; interferes with oxygen uptake
Haemophilus influenzae pneumonia	*Haemophilus influenzae*	Symptoms resemble pneumococcal pneumonia
