4. Represent the following information in scientific notation:
   (i) The world population is nearly 7000,000,000.
   (ii) One light year means the distance 9460528400000000 km.
   (iii) Mass of an electron is 0.000 000 000 000 000 000 000 000 000 00091093822 kg.

5. Simplify:

   (i) $(2.75 \times 10^{7}) + (1.23 \times 10^{8})$ (ii) $(1.598 \times 10^{17}) - (4.58 \times 10^{15})$

   (iii) $(1.02 \times 10^{10}) \times (1.20 \times 10^{-3})$ (iv) $(8.41 \times 10^{4}) \div (4.3 \times 10^{5})$

Activity - 3

The following list shows the mean distance of the planets of the solar system from the Sun. Complete the following table. Then arrange in order of magnitude starting with the distance of the planet closest to the Sun.

Planet	Decimal form (in Km)	Scientific Notation (in Km)
Jupiter		7.78×10^{8}
Mercury	58000000	
Mars		2.28×10^{8}
Uranus	2870000000	
Venus	108000000	
Neptune	4500000000	
Earth		1.5×10^{8}
Saturn		1.43×10^{8}

Exercise 2.9

Multiple Choice Questions

1. If n is a natural number then $\sqrt{n}$ is
   (1) always a natural number. (2) always an irrational number.
   (3) always a rational number (4) may be rational or irrational

2. Which of the following is not true?.
   (1) Every rational number is a real number. (2) Every integer is a rational number.
   (3) Every real number is an irrational number. (4) Every natural number is a whole number.

3. Which one of the following, regarding sum of two irrational numbers, is true?
   (1) always an irrational number. (2) may be a rational or irrational number.
   (3) always a rational number. (4) always an integer.

4. Which one of the following has a terminating decimal expansion?.
