Vani: Ok I will.

Agilan: Thank you.

b. Do you know what a Resume is? Have you seen or written one?

A resume is a document used by a person to present his educational backgrounds and professional skills. You have every little time to convince your employer that you deserve the job in an interview. So, your resume must summarise your accomplishments, your education, your work experience, and reflect your strengths.

A good resume/ CV/ bio-data

1. should summarize the applicant's accomplishments, education, work experience and strength.
2. should begin with the applicant's identification like name, address, e-mail, etc.
3. should include educational qualification like degree, diploma, etc.
4. should include work history with company name, job title, etc.
5. should start with the current experience and mention old ones chronologically.
6. should include two references (for verification of credentials).
