Chapter 3

(Confronting Critical Situations!)

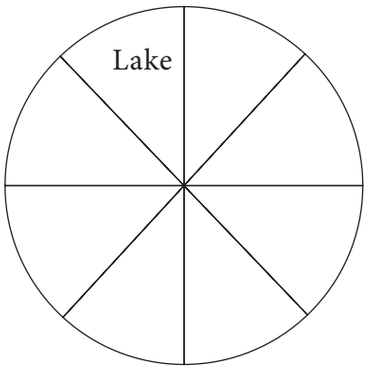

Dare the Waves!

H3YH5G

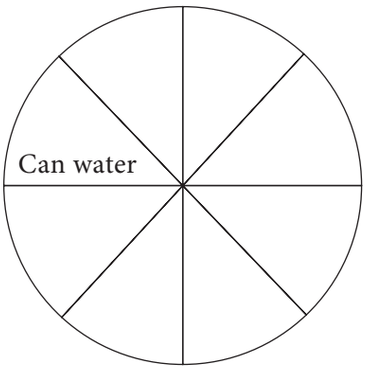

Warm-Up

a. In the two wheels given below, write the names of the different types of water sources found in the past and in the present times.

PAST

PRESENT

- How many glasses of water do you drink a day?
- Where do you get your drinking water from?
- What are the water sources you have seen or heard about?
- Have you ever got drenched in the rain?
- What is rainwater harvesting?

The dwindling water resources and vanishing water bodies have created a critical situation or serious problems for life on Earth. These issues are urgent and threatening and we need to think of solutions immediately. Brainstorm with your partner and list three each of short term and long-term solutions.

b. Work in pairs. Choose the correct word or phrase to complete the blanks.

i. Short on time _____ (urgent / important)

ii. Not ever known by anyone _____ (uncomfortable/ unfamiliar)

iii. Greatly affect one's life _____ (huge impact /high pressure)

iv. Not sure of the future _____ (uncertain/ threatening)

v. When things don't go well_____ (high on risk / high on potential)

vi. Unexpected occurrence requiring immediate action_____ (emergency / danger)
