The HAM Radio

Amateur Radio (ham radio) is a popular hobby and service that brings people, electronics and communication together. People use ham radio to talk across towns, around the world, or even into space, all without the Internet or cell phones. It's fun, social, educational, and can be a lifeline during times of need.

You can set up a ham radio station anywhere! Although Amateur Radio operators get involved for many reasons, they all have in common a basic knowledge of radio technology and operating principles.

Following India's independence in 1947, the first amateur radio organization, the Amateur Radio Club of India was inaugurated on 15 May 1948 at the School of Signals at Mhow, in Madhya Pradesh. The club headquarters was later moved to New Delhi, where it was renamed the Amateur Radio Society of India(ARSI). As India's oldest amateur radio organization, ARSI became its representative at the International Amateur Radio Union. By 1980, the number of amateur radio operators had risen to 1,500. The number of operators rose steadily, and by 2000 there were 10,000 licensed ham operators. As of 2007, there are more than 17,000 licensed users in India.

Amateur radio operators have played a significant part in disaster management and emergencies. In 1991, during the Gulf War, a lone Indian ham operator in Kuwait, provided the only means of communication between stranded Indian nationals in that country and their relatives in India. Amateur radio operators have also played a major part in disaster management. Shortly after the 2001 Gujarat earthquakes, the central government rushed teams of ham radio operators to the epicentre to provide vital communication links. In December 2004, a group of amateur radio operators on an Expedition in the Andaman Islands witnessed the 2004 Indian Ocean Tsunami. With communication lines between the islands severed, the group provided the
