on August 12th 2009. It enables visualization of Indian Remote Sensing (IRS) images taken over a year ago, by ISRO's seven satellites, including CartoSat-1 and CartoSat-2. Using Bhuvan connected to Internet, one can explore places of interest, scenes of events in the news or parts around the world they may never visit in person, by either entering the names of places or co-ordinates (latitudes and longitudes). Bhuvan has tremendous uses for scientists, academicians, policy makers and the general public.

Recap

- Surveying is the process of recording the measurements of a land area.
- Anaximander was the first ancient Greek to draw a map of the known world.
- Maps can show the whole or a part of the world.
- The art and science of map making is called Cartography.
- A map should include certain components namely, the title, scale, direction, grid reference, projection, legend, conventional signs and symbols.
- Grids are sets of lines for defining a location on a map.
- Remote sensing means acquiring information of things / places from a distance.
- Global Navigation Satellite System (GNSS) helps to locate, monitor and track a user's vehicle anywhere in the world.
- GIS is a combination of computer hardware, software, geographic data and the personnel.

EXERCISE

GL9CBB

I. Choose the correct answer

1. _____ indicates the purpose or theme of the map.

   a) Title
   b) Scale
   c) Direction
   d) Legend

2. Standard symbols that are used in maps to convey a definite meaning are called _____.

   a) conventional signs and symbols
   b) coordinates
   c) grid references
   d) directions

3. GPS consists of a constellation of _____ satellites.

   a) 7
   b) 24
   c) 32
   d) 64

II. Match the following

1.	The art and science of mapping	–	a) USA
2.	Actual shape of the earth	–	b) Geoid
3.	NAVSTAR	–	c) Cartography
