According to ***Aristotle***, if sovereignty resides in one person it is Monarchy. It degenerates into Tyranny. Thus the people wrest the State from the tyrant and give it to a few rulers and thus Aristocracy comes into being. Then it perverts into Oligarchy, people again revolt and transfer power to many rulers by which the State becomes a Polity. When this degenerates, it becomes a Democracy because these rulers no longer have sight of the common good for which the State came into being. This again gives rise to Monarchy.

Views on Slavery

According to ***Aristotle***, the slave is the first of the animate property of a Master, i.e., the slave is first among all living property of the household of which the master is the head. He says those who are not virtuous are slaves. The slave is an instrument of action and not that of production because as soon as he starts performing productive functions, he loses his character as a slave and becomes virtuous.

Views on Family

Aristotle believes that the family is a natural institution and in fact it existed prior to the State. It is natural as individuals become members from their very birth. It is the starting point of moral life and the nucleus of the State.

ACTIVITY

Is it true that ***Aristotle*** tutored Alexander the Great?

Yes, he did, at the request of Philp II of Macedon, the father of Alexander the Great.

Views on Property

Aristotle supported the possession of private property which is essential for good and normal life. However, he prescribed limits to private property. He also objected to the abolition of private property.

Aristotle an Liesure

The reason ***Aristotle*** says the citizens of a State must have property as well as slaves is because the citizens must have leisure, so that the citizen may spend useful time in thinking and deliberating on furthering the good life of all though the State.

Views on Revolution

Aristotle is of the opinion that revolutions occur firstly due to constitutional changes. This change could be large or small. For **e.g.:** change from Monarchy to Tyranny could set off a revolution by the people. Secondly he says revolutions could occur due to loss of purpose of the State though there may not be any change in the State's constitution.

Aristotle's Six Forms of Government

Thus, ***Aristotle*** is still considered one of the greatest thinkers in politics, psychology and ethics. His intellectual range was vast covering most of the sciences and many of the arts. His works have laid the foundation of centuries of philosophy. Even after the intellectual revolution of the Renaissance, the Reformation and the Enlightenment, Aristotelian concepts remain embedded in world philosophy. Therefore, he is undoubtedly one of the most influential philosophers of all time.
