Population

It is the people who make the State. The population is essential for the State. What should be the size of the population has been a debate by thinkers from ancient time. According to ***Plato***, the ideal number would be 5040. According to ***Aristotle***, the number should be neither too large nor too small. It should be large enough to be self – sufficient and small enough to be well governed. ***Rousseau*** determined 10,000 to be an ideal number for a State. Ancient thinkers view on the number was based on the small city – States like Athens and Sparta. The modern States vary in population. India has a population of 121.02 cr people according to 2011 census of India.

According to Plato, the ideal number of State is 5040. The reason is the number 5040 is divisible by numbers from 1 to 12. In the case of 11 the reminder is 2. During the time of emergency the population can be divided in various columns and instructions could be given.

Territory

People need territory to live and to organize themselves socially and politically. It may be remembered that the territory of the State includes land, water, and air space. The modern States differ in their sizes. The territory is necessary for citizenship. As in the case of population, no definite size with regard to extent of the area of the State can be fixed. There are small and big States. In the words of Prof. Elliott, "Territorial sovereignty or the superiority of State, overall within its boundaries and complete freedom from external control has been a fundamental principle of the modern State life".

India has an area of 32,87,263 sq. km. approximately India occupies 2.4% of the global area. The opening article of the Indian Constitution speaks about the Territory of India.

There is a restriction of movement of individuals from one State to another State in the name of territorial sovereignty. But sitting in one country you can communicate to a person to another country using the internet. How do you see this to do with the sovereignty of the States? Examine why social networking websites like Facebook, twitter and YouTube are banned in some countries.

Government

Government is the working agency of the State. It is the political organization of the State. Indian political scientist ***Prof. A. Appadurai*** defined government as the agency through which, the will of the State is formulated, expressed and realized. According to ***C.F. Strong***, in order to make and enforce laws, the State must have a supreme authority. Government is a fixed structure.

Sovereignty

The fourth essential element of the State is sovereignty. The word 'sovereignty" means supreme and final legal authority above. No legal power can exist beyond sovereignty. The concept of "sovereignty" was developed in conjunction with the rise of the modern State. The term Sovereignty
