# Unit 9 Fuel Supply System

Contents

9.0 Introduction
9.1 Fuel Supply System in Petrol Engine
9.2 Types of Fuel Supply System
- 9.2.1 Gravity System
- 9.2.2 Vacuum Feed System
- 9.2.3 Pump System
- 9.2.4 Injection System

9.3 Fuel Supply System Components (Petrol Engine)
- 9.3.1 Petrol Pump
  - 9.3.1.1 AC Mechanical Petrol Pump
  - 9.3.1.2 SU Electrical Fuel Pump

9.4 Air Fuel Ratio
- 9.4.1 Rich Mixture
- 9.4.2 Chemically Correct (or) Stoichiometeric Mixture
- 9.4.3 Lean Mixture

9.5 Carburettor
- 9.5.1 Function of Carburettor
- 9.5.2 Requirements of Carburettor
- 9.5.3 Types of Carburettor
  - 9.5.3.1 Down Draught Carburettor
  - 9.5.3.2 Up Draught Carburettor
  - 9.5.3.3 Side Draught Carburettor
- 9.5.4 Simple Carburettor
- 9.5.5 Solex Carburettor

9.6 Petrol Injection
- 9.6.1 Advantages of Petrol Injection Technique
- 9.6.2 Types of Petrol Injection

9.7 Comparison Between MPFI and Carburettor
9.8 Method of Fuel Supply (Diesel Engine)
9.9 Fuel Injection Pump
- 9.9.1 Inline (Jerk Type) Pump
- 9.9.2 Distributor Pump

9.10 Governor
- 9.10.1 Governor Terminologies

9.11 Diesel Knock
- 9.11.1 Reasons for Diesel Knock

9.12 Common Rail Direct Injection
- 9.12.1 Advantage of CRDI System
