S.No	Description	Measurement
1	Main Scale Reading (MSR)	––––– mm
2	Vernier scale Reading (VSR)	––––– mm
3	Error (Positive/Negative)	––––– mm
	Final measurement	––––– mm

b) Inside Diameter

- Fix the given object in between the fixed jaw and movable jaw for internal measurement.
- Using fine adjusting screw, adjust and lock the locking screw.
- Now take the internal measurement of the object.

S.No	Description	Measurement
1	Main Scale Reading (MSR)	––––– mm
2	Vernier scale Reading (VSR)	––––– mm
3	Error (Positive/Negative)	––––– mm
	Final measurement	––––– mm

c) Depth

- Take the depth measurement using bar given backside of the main scale in the verniercaliper.
- Adjust the length of bar by moving the movable jaw of a verniercaliper. Adjust and lock the locking screw.
- Now take the depth measurement of the object.

S.No	Description	Measurement
1	Main Scale Reading (MSR)	––––– mm
2	Vernier scale Reading (VSR)	––––– mm
3	Error (Positive/Negative)	––––– mm
	Final measurement	––––– mm

Conclusion

Measurements are taken accurately and tabulated.
