b) Cross Peen Hammer

A cross PEEN hammer is a hammer used by blacksmiths to complete metal work. The wedge-shaped end of the hammer allows you to make the metal puller when used with heat. The main functions of a cross peen hammer are forging and riveting. Forging is a process in which you heat a single piece of metal and use tools to obtain a particular shape. Fig 2.1.1.3(b) shows Cross Peen Hammer.

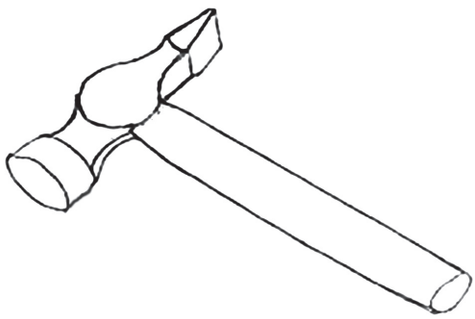

Figure 2.1.1.3(b) Cross Peen Hammer

c) Straight Peen Hammer

In this hammer, either side of the face does not have any projections, unlike other hammer types. This is used for general purpose. Fig 2.1.1.3(c) shows Straight Peen Hammer

Figure 2.1.1.3(c) Straight Peen Hammer

d) Sledge Hammer

The weight of this hammer is two or three times more than the ordinary type hammer. This is mainly used for blacksmith purpose. Their handles are made only of wood. Fig 2.1.1.3(d) shows Sledge Hammer.

e) Mallet Hammer

This is often used for SHEET METAL jobs. MALLET HAMMER can be used to adjust curves in some sophisticated and smooth objects. This makes the vehicle more useful during tinker. Fig 2.1.1.3(e) shows Mallet Hammer.
