Rasp Cut File

This is a file of teeth that are separated by straight and parallel lines. The face of the teeth is slightly upward compared with the file face. It is used to work on smooth materials such as wooden, leather, aluminium.

Curved Cut File

It is capable of cutting deeply. It is used to work on smooth materials such as aluminium, tin, copper and plastic.

2.1.1.8 Drill Bits

Fig 2.1.1.8 shows the different types of Drill Bits. Round shaped rotating drill bit is called as twist drill bit. If a job is drilled from top to bottom is called through hole and if a job is partially drilled for a distance then it is called as blind hole. The drill bit is made up of High-speed steel. It has the polygonal cutting edge. The types of drill bits are given below.

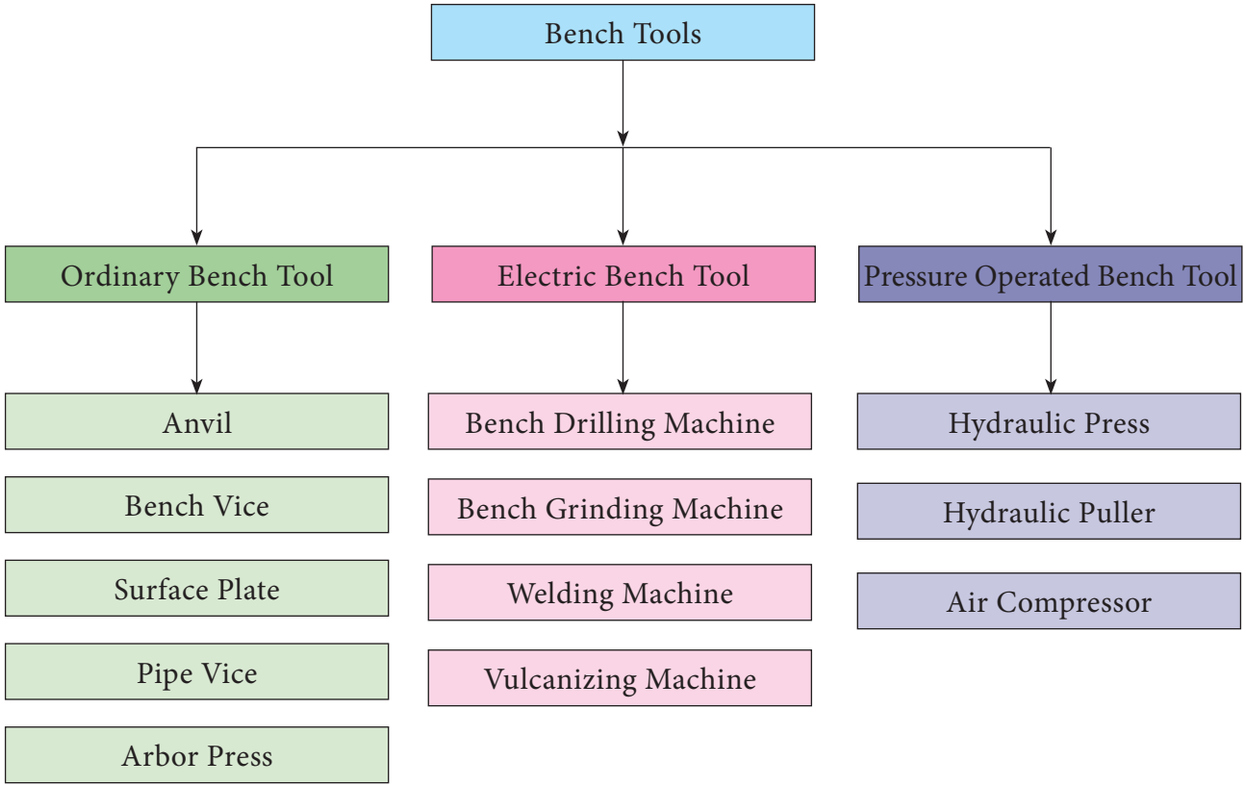

Figure 2.1.1.8 Drill Bits

Types of Drill Bits

- Straight shank twisted drill bit
- Taper shank twisted drill bit

2.1.2 Bench Tools

It is not possible to have all the corrective measures for the damaged vehicle at the particular location itself. Due to this, some defected parts are removed from the vehicle. These parts are then brought back to the
