2.3.5(b) Grease Gun

Grease gun is used in automotive vehicle to reduce the friction in the moving parts by applying the pressurized grease. This is done with the aid of air compressor. It is also used to fix a new lining in the top portion of the brake shoe. Fig 2.3.5(b) shows Grease Gun.

2.3.5(c) Air Compressor

It is used in automatic machines where air pressure is required. This means by using this amount of air pressure required to restrict the passage is done. In added to this, it is used for to refill the air in the tire, paint, clean and water wash the vehicle. The amount of air which has been used for all this purpose is generated from the equipment which is named as an air compressor. Fig 2.3.5(c) shows Air Compressor.
