Item sold	Jan	Feb	Total
Books	15	70	=<B2>+<C2>
Pens	30	50	
Ruler	25	25	
Total Goods	**70**		

- If you want to perform calculations using individual cells, individual cell reference should be placed within <> .

Note : In the table structure the columns are labelled as A, B, C……and the rows are numbered as 1,2,3,…… etc. For Ex. The first cell is referred as A1, B1 etc.

- In the above example, to find the sum, of the books purchased in January and February, the total is calculated using the formula =<B2>+<C2>.
- A subtraction formula for instance is given as =<B2>-<C2>.
- If you want something more complicated than addition, subtraction, multiplication, and division, click on the formula dropdown list as shown in Figure 7.12.

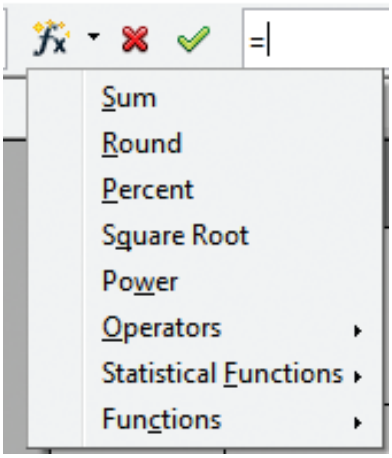

Figure 7. 12 Formula dropdown list

Workshop

7-1 Open a new document.

- Using icon or table menu create the given table with 5 rows and 6 columns with the labels S.No., Name, Maths, Phy, Che and Total
- Calculate the Total of three subject using SUM functions.
- After the sixth row add a new row and type suitable data for the new row.
- Delete the second row using icon or command.
- Using icon or command after the second column add a new column and type suitable data for the new column.
- Delete any one column using icon or command.
- Save and close the document.

7-2 Open the document created in workshop-7.1.

- Do the following options
- Change the border style and border line width for one table.
- Change height and width for the row and column respectively.
- Save and close the document.
