- Place the insertion pointer in your document where you want the character to appear
- Click on the **Insert → Special Character**
- The **Special Character dialog box** appears as shown in Figure 7.15 from which the desired symbol can be selected by clicking on the character.
- Click the OK button to insert the special character.

Open Office Writer helps to insert mathematical equations using the various symbols. These equations can be inserted by following the steps below:

- Click on the **Insert → Object → Formula**
- The equation editor opens at the bottom of the screen.
- Click in the equation editor and type the equation.
- To include symbols in the equation Right-click in the equation editor and select the symbol from the pop-up menu.
- Click inside the document to include the equation in the document and this will automatically exit the control from equation editor.
- Double-click on a formula to edit the equation.

7.4.3 Inserting And Editing Shapes

OpenOffice Writer uses the drawing tools, to create various shapes by using the Drawing toolbar. Select **View → Toolbars → Drawing** to display Drawing toolbar as on Figure 7.16 which contains various drawing tools.

To use a drawing tool:

- Click in the document where you want the drawing.
- Select the **tool** from the **Drawing toolbar**. The mouse pointer changes to a **cross-hair pointer.**
- Move the **cross-hair pointer** to the place in the document where you want the drawing to appear and then click-and-drag to create the drawing object. Release the mouse button. The selected drawing function remains active, so you can draw another object of the same type.
- To cancel the selected drawing function, press the **Esc** key or click on the **Select icon** on the **Drawing toolbar**.
