Mail Merge & Additional Tools

8.1 Mail Merge

A word processing task is to create a document with different mailing addresses for sending to different people. The mailing feature in Word processor helps the user to organize the address data and merge it into a document and prints it out in the desired format.

The main feature of Word processor is **Mail Merging**. Merging a list of names and addresses to a single document that can be sent to different people in their names and addresses.

Multiple copies of a document can be sent to a list of different recipients (form letters) through the following facilities.

- Mailing
- labels
- Envelopes

All these facilities, are related to a registered "data source". The Variables refer different field of **data source**.

Creating data source for mail merge:

A data source is a database containing the name and address or records of other information from which a mailing list may be derived. Printing the mailing labels and envelopes does not require data source facilities.
