Open Office Mail merge can access a wide variety of data sources, including spreadsheets, text files and databases such as MySQL, Adabas, and ODBC

The following example uses a spreadsheet with the following column (field) headers: Title, First name, Last name, Address, State/Country, Country, Post Code, Gender, and Points. The mail merge wizard is shown in Figure 8.1. The following steps perform mail merge operation.

Tools -> Mail Merge Wizard

Step 1: Select starting document

This step has five options:

- Use the current document.
- Create a new document.
- Start from an existing document.
- Start from a template.
- Start from a recently saved document.

Choose "Create a new document" option and click **Next Button**

Step 2: Select document type

This step has two options:

- Letter
- E-mail message

Choose "Letter" as option - to send letters to a group of recipients as shown in Figure 8.2.

Click **Next button**
