One can also save, merge, print and send merged document as E-mail using this step.

Click **finish** to view the mail merge on the screen.

8.2 Additional Tools

8.2.1 Spell Check

The documents prepared using word processing software should be without any spelling mistake. For this purpose OpenOffice Writer includes a dictionary and spell check program. OpenOffice Writer can identify the spelling mistakes as the document is typed or after the entire document is typed.

8.2.2 AutoSpellCheck

AutoSpellCheck option checks each word as it is typed and displays a wavy red line under any misspelled word. Once the word is corrected, the red wavy line disappears. This can be done by clicking the AutoSpellCheck icon. ABC

Right-click on a word with a wavy underline, to open a powerful context menu. Correct words can be selected from the suggested words on the menu. The selection will replace the misspelled word with correct word.

To perform a separate spelling check on the document (or a text selection) click the Spelling and Grammar icon ABC. This checks the document or selection and opens the Spelling dialog box (Figure 8.15) if any misspelled words are found. This can also be achieved by pressing F7 key.
