

Figure 9.37 Insert cell tool bar

9.10 Deleting columns and rows

A single or multiple columns or rows can be deleted.

Inserting a new Column or row is really possible in a Spreadsheet?

All spreadsheets have some specific number of rows and columns, then is it possible to insert an additional row or column?

Technically this is NOT POSSIBLE.

Additional column, row or even cell cannot be inserted in any spreadsheet. When you insert a column or row, the contents within the column or row will be shifted to the next column or row. But visually it is felt that a new column or row has been inserted.

9.10.1 Delete single column or row

A single column or row can be deleted by using the mouse:

- Select the column or row to be deleted.
- Choose **Edit →Delete Cells** from the menu bar.

(or)

- **Right-click** on the column or row header.
- Choose **Delete Columns** or **Delete Rows** from the pop-up menu.

9.10.2 Delete multiple columns or rows

Multiple columns or rows can be deleted at a time. Refer **Figure 9.38.**

- Select the required columns or rows to be deleted.
- **Right-click** on the selected columns or row.
- Choose **Delete Columns** or **Delete Rows** from the pop-up menu or **Edit → Delete Cells.**

Workshop:

1. Open the spreadsheet which was created in Illustration 1.
2. Delete the details of any 3 students. Save the changes and close the file.

Deleting Column or Row is not Possible

Same as inserting column or row, Deleting a column or row is also not possible. No one can delete any column or row in a spreadsheet. When you delete a column or row, all the contents will be removed from the column or row. Actually, this is also another kind of deleting contents from a column or row.
