Example

=COMBINA(3;2) returns 6, =COMBINA(4;3) returns 20

COS (Number)

Returns the (trigonometric) cosine of Number, whose angle is in radians. To return the cosine of an angle in degrees, use the **RADIANS** function.

Examples:

=COS(PI()/2) returns 0, the cosine of PI/2 in radians.

=COS(RADIANS(60)) returns 0.5, the cosine of 60 degrees.

COUNTBLANK (Range)

Returns the number of empty cells in the cell range.

Example:

=COUNTBLANK (A1:B2) returns 4 if cells A1, A2, B1 and B2 are all empty.

COUNTIF (Range; Criteria)

Range is the range where the criteria is to be applied.

Example:

The Criteria determines which cells are counted and is in the form of a number, an expression or a text string. The search text may also be given in the form of a regular expression. The command "b.*" is given for all words that begin with b. If search is for literal text, enclose the text in double quotes.

A1:A10 is a cell range containing the numbers 2000 to 2009. Cell B1 contains the number 2006. In cell B2, you enter a formula:

=COUNTIF (A1:A10;2006) - this returns 1

=COUNTIF (A1:A10;B1) - this returns 1

=COUNTIF (A1:A10;">=2006") - this returns 4

=COUNTIF (A1:A10;"<"&B1) - when B1 contains 2006, this returns 6

=COUNTIF (A1:A10;C2) where cell C2 contains the text >2006 counts the number of cells in the range A1:A10 which are > 2006.

To count only negative numbers: =COUNTIF (A1:A10;"<0")

10.11.3.2 - Statistical functions

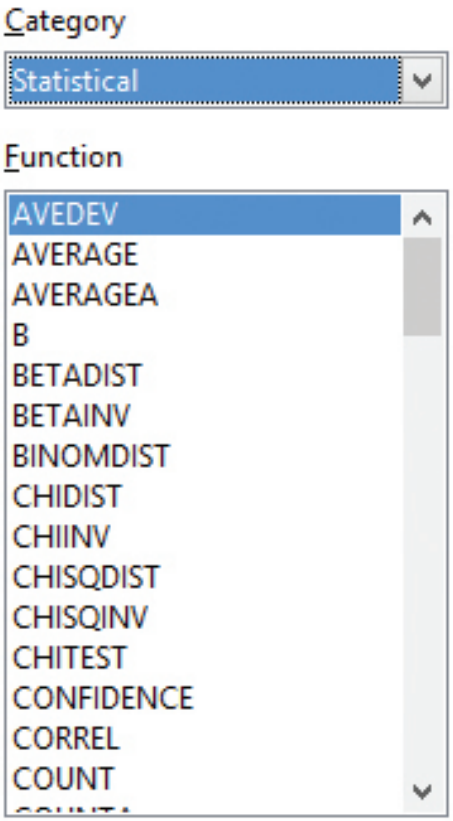

Figure: 10.25 Statistical functions

COUNT(Value1; Value2; ... Value30)

Counts how many numbers are in the list of arguments. Text entries are normally ignored. Value1; Value2; ... Value30 are 1 to
