Bubble chart

A bubble chart shows the relation of three variables. Two variables are used for the position on the x-axis and y-axis, while the third variable is shown as the relative size of each bubble.

The **Data Series dialog box** for a bubble chart has an entry to define the data range for the Bubble Size.

Net chart

A Net chart displays data values as points connected by some lines, in a grid net that resembles a spider net or a radar tube display.

For each row of chart data, a radial is shown on which the data is plotted. All data values are shown with the same scale, so all data values should have the same magnitude.

Column and line chart

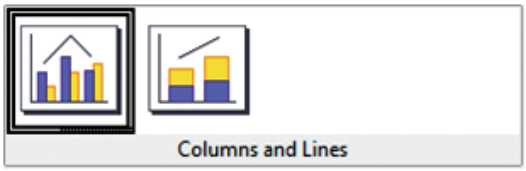

Figure: 10.34 Column and Line Charts

A Column and Line chart is a combination of a Column chart with a Line chart.

Select one of the variants

- Columns and Lines. The rectangles of the column data series are drawn side by side so that you can easily compare their values.
- Stacked Columns and Lines. The rectangles of the column data series are drawn stacked above each other, so that the height of a column visualises the sum of the data values.
- You can insert a second y-axis with Insert - Axis after you finish the wizard.
