CHAPTER 11

# Data Tools and Printing

**Learning Objective**

- To Learn various data processing tools in spreadsheet.
- To Learn about page formatting and printing in the spreadsheet.

QXTA6H

## 11.1 Data tools

Data Tools are used to manipulate the information in spreadsheet. The data tools in spreadsheet are used for automated manipulation. For the new users, these tools may be like advanced options. But, a user who is experienced in these tools can do complex manipulation in a simple way.

## 11.2 Applying conditional format

An important aspect of the data tools lies in the visualization of those data for easy understanding of the user. Conditional formatting gives different font size, font colour and background colour for different data, based on the user requirement.

Cell formats help to change the font size, font colour, background colour depending on conditions that we specify. For example, in a table of numbers, all the values above average can be displayed in green and below average in red by specifying condition.

For example, if the marks of the students are entered in the spreadsheet. The marks should be shown in different colours for different mark ranges.

**Illustration 11.1:** Apply the conditional formatting for **Table 11.1** as for the condition given below.

1. Mark less than or equal to 50 in Lightgreen
2. Mark greater than 50 in blue

**Table 11.1 Data with conditional Formatting**

| Name | Marks |
|---|---|
| Kumar | 32 |
| Arun | 67 |
| Gayathri | 50 |
| Chandru | 98 |
