Figure 11.8 Sorted Table

Note: Names are arranged in Ascending order according to names, while the other data are also rearranged simultaneously.

11.3.3 Sort by selection

In Calc sorting can be done on selected range. But this kind of sorting is generally not recommended, because the other relevant data are also not sorted. Therefore, OpenOffice Calc displays a warning message for this type of sorting. Refer **Figure 11.9.**

Sorting data by selection:

Step 1: Select any particular field in which you want sort.

Step 2: Click required Sort icon from standard tool bar or **Data** → **Sort** command.Calc displays a **"Sort Range"** warning message as shown in the **Figure 11.9** "Sort Range" message box has two options, viz. (1) Extend selection (2) Current selection.

Step 3: "Extend Selection" – Sorts the data beyond on the selection. "Current Selection" – Sort only the selected range of data, remaining data are not sorted.
