CHAPTER 12

Presentation Basics

QY368J

Learning Objectives

After learning this chapter, the students will be able to

- Know the OpenSource presentation software
- Explore opening a new presentation using Impress
- Create a new presentation using various ways using Impress
- Know parts of the main Impress Window
- Differentiate five sections of Task pane
- Explain Window elements of Impress
- Differentiate various views in Workspace
- Explore drawing Objects and inserting OLE
- Draw freeform shapes
- Rotate Objects
- Create animation in slides/objects

12.1 Presentation Software - Meaning

- A presentation software is a computer software package used to show information, in the form of a slide show.

It includes three major functions:

- an editor that allows the text to be inserted and formatted,
- a method for inserting and manipulating graphic images.
- a slide-show system to display the content.
- Presentation software is used to create presentations, quizzes, e-learning packages and multimedia products.
- Most presentation software packages will create your multimedia product using a series of slides.
- Text, images, video, animation effects, links and sound can be combined on each slide to create a final product.

The most commonly known presentation programs are OpenOffice Impress, Microsoft PowerPoint and Apple's Keynote. In this chapter, we are going to explore on OpenOffice presentation Software Impress.
