12.2. Impress

Impress is the OpenOffice presentations (slide show) module. You can create slides using Impress. It contains different elements like text, bullets and numbered lists, tables, charts, clipart and a range of graphic objects. Impress has access to the spelling checker and thesaurus. Also, it comes with pre-packaged text styles, background styles with online help.

12.3. Opening a new presentation

You can start Impress in several ways:

- In order to open Impress using **Start button**, click Start button and select **All Programs** → **OpenOffice** 4.1.4 → **OpenOffice Impress**. (**Figure 12.1**)
- If it is already pinned in the Start menu, just click and open it. (**Figure 12.2**)

12.4. Creating a new presentation

You can create a presentation by any one of the following methods.

1. By selecting an Empty presentation
2. By selecting From Template

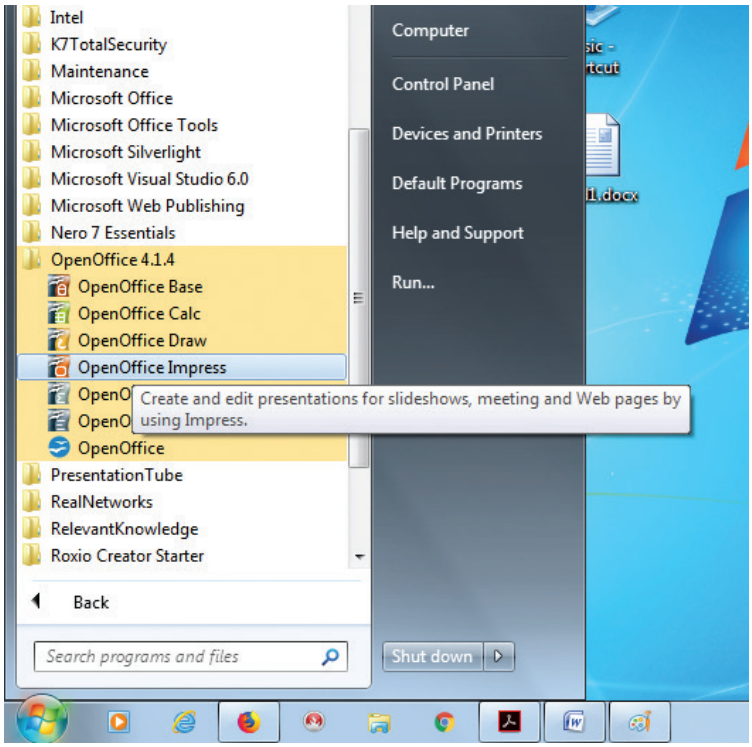

Figure 12.1 – Opening Impress using Start → All Programs

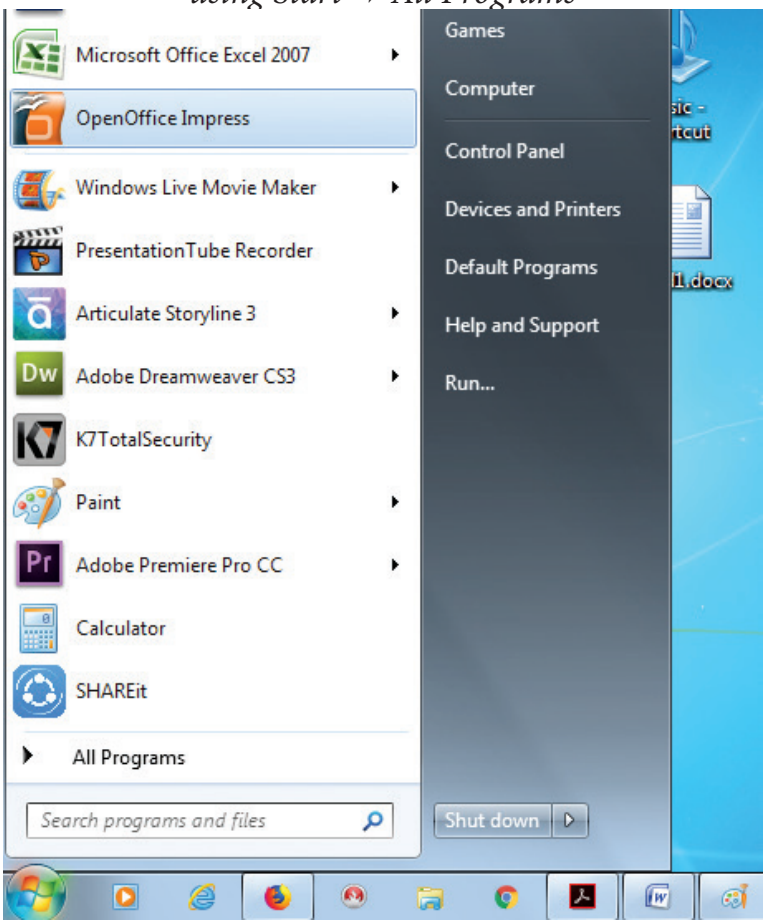

Figure 12.2 – Opening Impress using Start button

3. By selecting from Open existing presentation
