Multipoint videoconferencing allows three or more participants to sit in a virtual conference room and communicate as if they were sitting right next to each other.

14.10. Network Security Concepts

14.10.1.Cyber Law

Cyber law is the part of the overall legal system that deals with the Internet, cyberspace, and their respective legal issues. Cyber law covers a fairly broad area including freedom of expression, access to and usage of the Internet and online privacy. Cyber law has been referred to as the Law of the Internet.

Figure 14.23 Cisco Hardware Firewall

A firewall is a network security system, either hardware- or software-based, that uses rules to control incoming and outgoing network traffic. A firewall acts as a barrier between a trusted network and an untrusted network.

Cookies

Cookies are small files which are stored on a user's computer. They are designed to hold a modest amount of data specific to a particular client and website, and can be accessed either by the web server or the client computer.

Hacking

Computer hacking refers to the practice of modifying or altering computer software and hardware to accomplish a goal that is considered to be outside of the creator's original objective. Those individuals who engage in computer hacking activities are typically referred to as "hackers."

Crackers

A cracker is someone who breaks into someone else's computer system, often on a network; bypasses passwords or licenses in computer programs; or in other ways intentionally breaches computer security.

Points to Remember:

- A computer network is an interconnection of various computers
- ARPANET was established by the Advanced Research Projects Agency (ARPA) in 1969
- World Wide Web was created by Timothy Berners Lee in 1989 at CERN in Geneva.
- Web page is a document available on World Wide Web
- Web Browser is an application software that allows us to view and explore information on the web
- Web server is a computer where the web content is stored. Basically web server is used to host the web sites
- Internet is a world-wide global system of interconnected computer networks.
