- Type your document name in the File Name text box.
- All documents in OpenOffice Writter will be stored with **.odt** extension. You can store your OpenOffice document as Microsoft Word document or .**pdf**. To do so, select file type from **Save as list box** and select the required file type.
- Finally, Click **"Save"** button.
- Once the file is saved, your document name will be displayed on the title bar.

Saving with password

In OpenOffice Writer, a document can be protected with a password. You can set a password to protect your document while saving a file. To save a file with password, click on "**Save with Password**" check box in Figure 6.11 and then click "Save" button. Immediately it shows "Set Password" dialog box as shown in Figure 6.12.

Figure 6.12 – Password dialog box

In this dialog box, Enter a password in "Enter Password to open" text box and retype the same password in "Confirm Password" box for confirmation. Finally click **"OK"** button.

6.2.7 Closing a Document

After your document is saved, it is still open. So, you can continue typing your document. When the work is finished, you should save the document and close the document using File → Close command (or) Press Ctrl + W.

Closing Unsaved Document:

When you close an unsaved file using the close control button, Writer shows a warning message (Refer Figure 6.13).

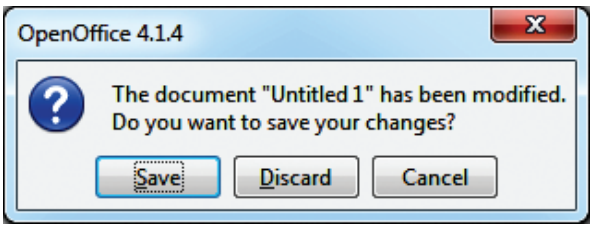

Figure 6.13Alert Message box

If you accept the warning message, click the "Save" button. When you click the "Save" button, it proceeds to save the file. If you are not willing to save the file, then click "Discard", or if you want to cancel this warning and continue working in the same document, click "Cancel".

6.2.8 Opening an existing document

Once a document is saved, it can be opened at any time. To open an existing

document, Click on the **File → Open** or
