6.8.2 Indenting text

Indent is the distance from the left and right margin of a paragraph. It is used to improve the efficiency and readability of the paragraph and makes the paragraph look more attractive. In paragraphs, an easy way to apply indent for the first line of text can be created by moving the insertion pointer to the begining of the line and pressing the tab key on the keyboard.

There are two ways to apply indents:

- Using Icons
- Using Dialog Box

Using Icons :

Increase Indent Icon : The increase indent icon controls the space between the paragraph and the left margin. Each click on the Increase indent icon moves the paragraph ½ inch away from the left margin.

Decrease Indent Icon : This is reverse of increase indent. It undoes the indent applied by increase indent. Each click on the Decrease indent icon moves the paragraph ½ inch away from the right margin.
