6. In a forest, if the bark of a tree is damaged by the horn of a deer, How will the plant overcome the damage?
7. In which season the vessels of angiosperms are larger in size, why?
8. Continuous state of dividing tissue is called meristem. In connection to this, what is the role of lateral meristem?
9. A timber merchant bought 2 logs of wood from a forest & named them A & B, The log A was 50 year old & B was 20 years old. Which log of wood will last longer for the merchant? Why?
10. A transverse section of the trunk of a tree shows concentric rings which are known as growth rings. How are these rings formed? What are the significance of these rings?

ICT Corner

Characteristics of Dicot and Monocot Stem and Root

Let's explore **inside Stem and Root**

B166_11_BOT_EM

Steps

- Scan the QR code or go to Google play store.
- Type online labs and install it.
- Select biology and select Characteristics of dicot and monocot stem and root.
- Click free sign up and provide your basic information with valid mail-Id.
- Login with your registered mail id and password.
- Choose theory tab to know the basic about anatomical structure of plant parts.
- Choose animation to view the sectioning process.
- Choose simulation tab and view the section of plant parts under microscope.

Activity - Do the section through simulation and record your observations.
