Unit 3

Polymer Chemistry

Learning Objectives

- Recognize various types of fibres
- Conduct activities to learn the characteristics of synthetic fibres
- List the advantages and disadvantages of synthetic fibres
- Differentiate between thermoplastics and thermo-setting plastics
- Identify various types of plastics based on the resin codes
- Realize the impacts of plastics on humans, animals and the environment.
- Recall the different methods and hierarchy of disposing waste based on the 5R principle
- Explore the complexities of bio-plastics
- Gather information about plastic eating bacteria
- Learn about glass and its types and uses
