

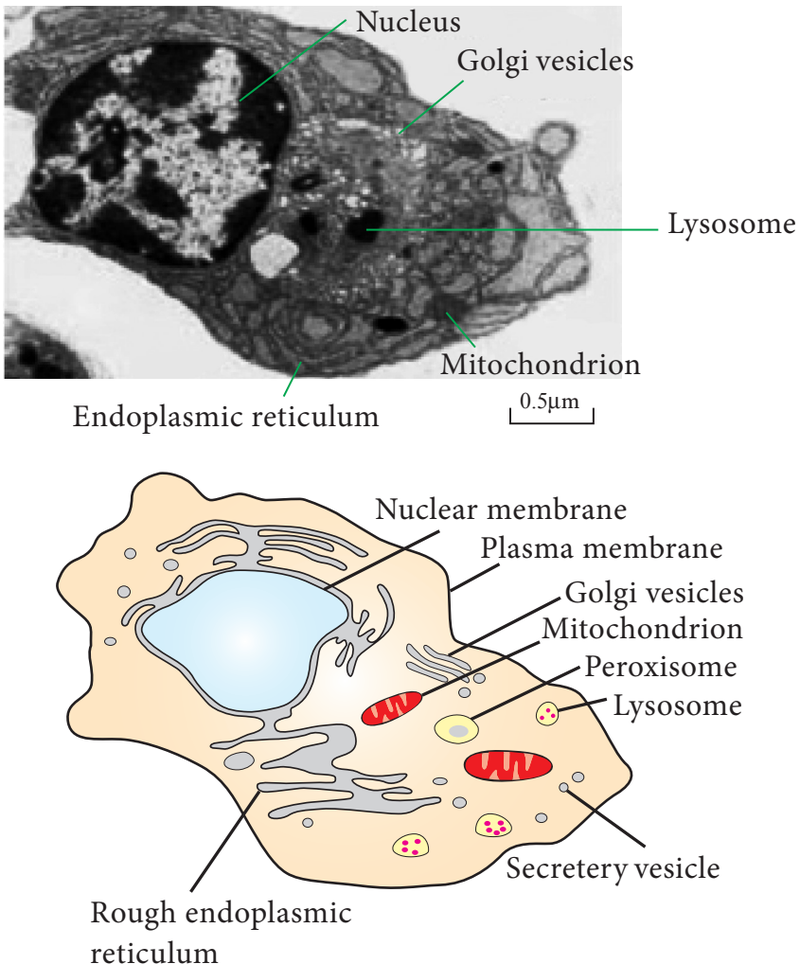

Figure 1.2 Structural organization of the eukaryotic cell

Table 1.1 Differences between prokaryotic and eukaryotic cells

Feature	Prokaryotic cell	Eukaryotic cell
Size	Usually 0.2–2 µm	Usually 5–100 µm
Nucleus	Absent	Present
Number of chromosomes	one (It is not true chromosome, but is a plasmid/extrachromosomal DNA)	More than one
True membrane bound organelles	Absent	Present
Examples	Bacteria and Archaea bacteria	Animals and Plants
Genetic recombination	Partial, unidirectional transfers	Meiosis and fusion of gametes
Lysosomes and peroxisomes	Absent	Present
