Unit 2 BIOMOLECULES

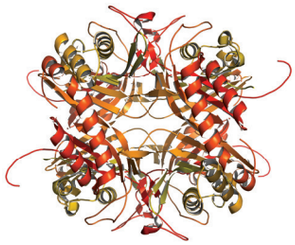

Lipids

Nucleic Acids

Carbohydrates

Proteins

Friedrich Wöhler

Friedrich Wöhler was a German chemist best known for his synthesis of urea from ammonium cyanate in 1828 (Wohler synthesis), which was the first synthesis of an organic chemical compound from an inorganic one; it contributed to the foundation of modern organic chemistry.

Learning Objectives

After studying this unit, students will be able to

- Classify the different biomolecules.
- Describe the importance of carbohydrates.
- Distinguish monosaccharides, oligo saccharides and polysaccharides.
- Classify various types of proteins.
- Explain the functions of proteins.
- Classify various types of lipids.
- Explain the biological functions of lipids.
- Describe the biological functions of nucleic acids.
- Differentiate between DNA and RNA.
