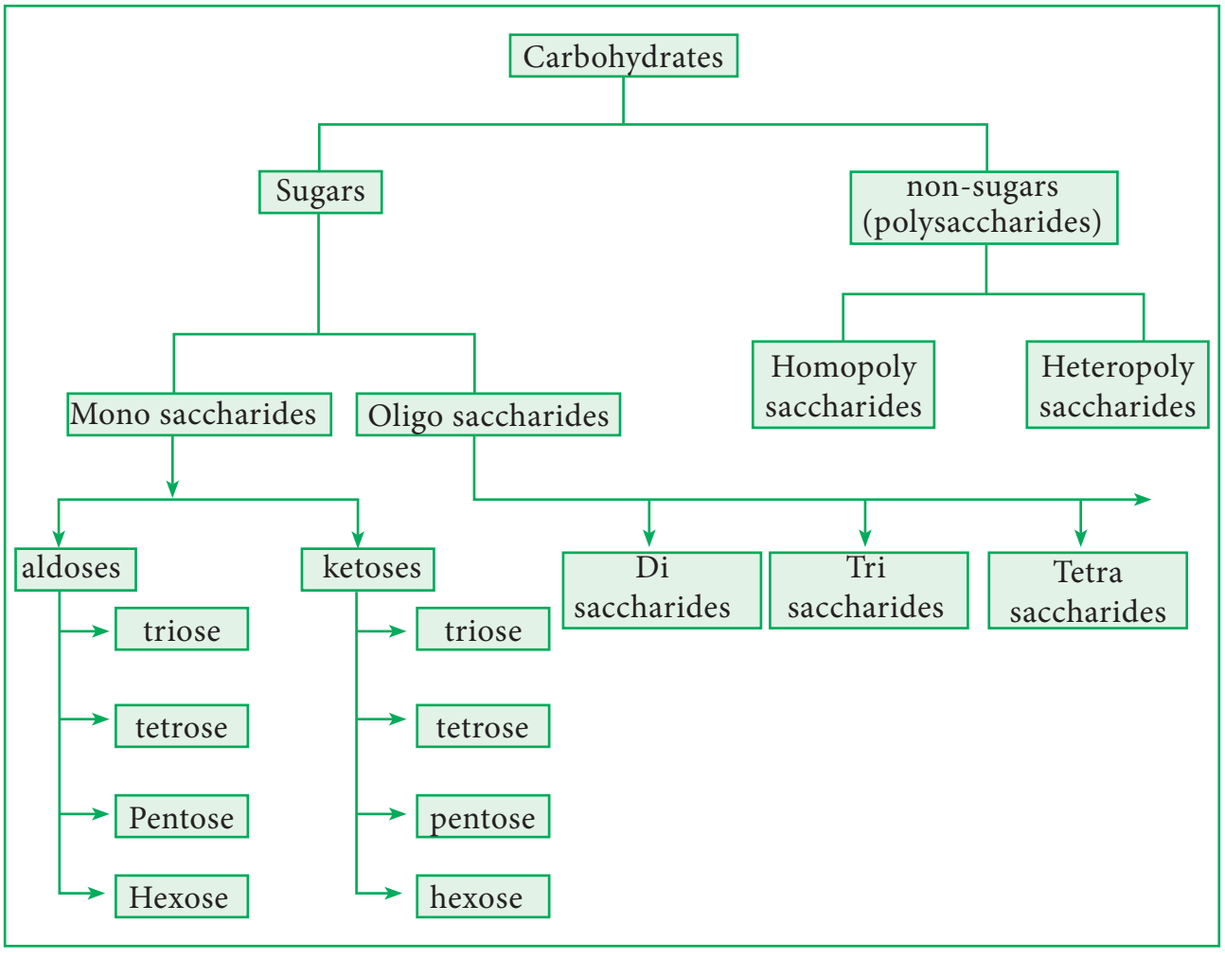
2.1.3 Classification

Carbohydrates are generally classified as Sugars and Non-sugars.



Sugars

Sugars are sweet, crystalline and soluble in water. They are classified further as below.

2.1.4 Monosaccharides

Mono saccharides have a general formula $C_n(H_2O)_n$. Based on the number of carbon atoms they are further classified into trioses, tetroses, pentoses, hexoses etc. They can also be classified as aldoses and ketoses based on the functional group present in them. They cannot be hydrolysed into simpler units. This can be further classified as aldoses and ketoses based on the functional group present in C1 position.
