ii) Phosphoinositides:

In these phospholipids, inositol is connected with phosphatidyl group. Example: Phosphatidylinositol (lipositol)

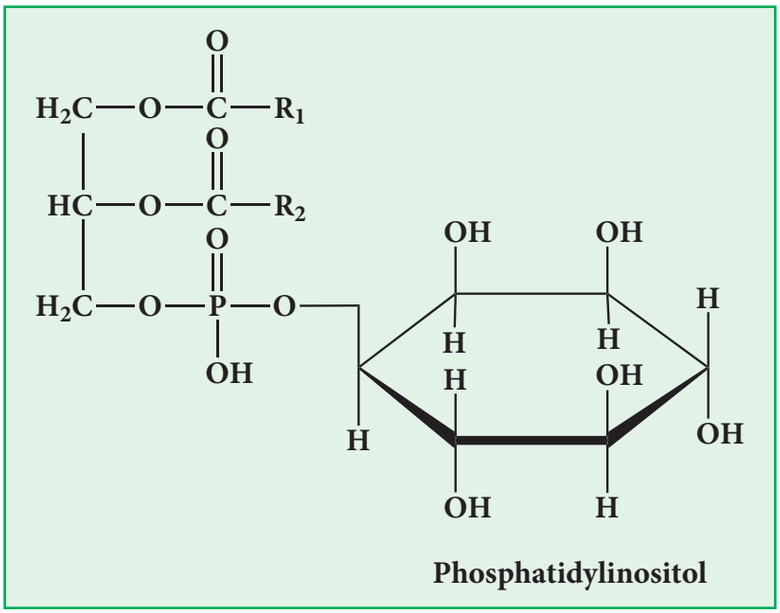

Figure 2.11 Structure of phosphatidylinositol

iii) Phosphosphingoside:

A group of phospholipids containing 1-phosphocholine combined with a ceramide (sphingosine + fatty acid). Example: Sphingomyelin

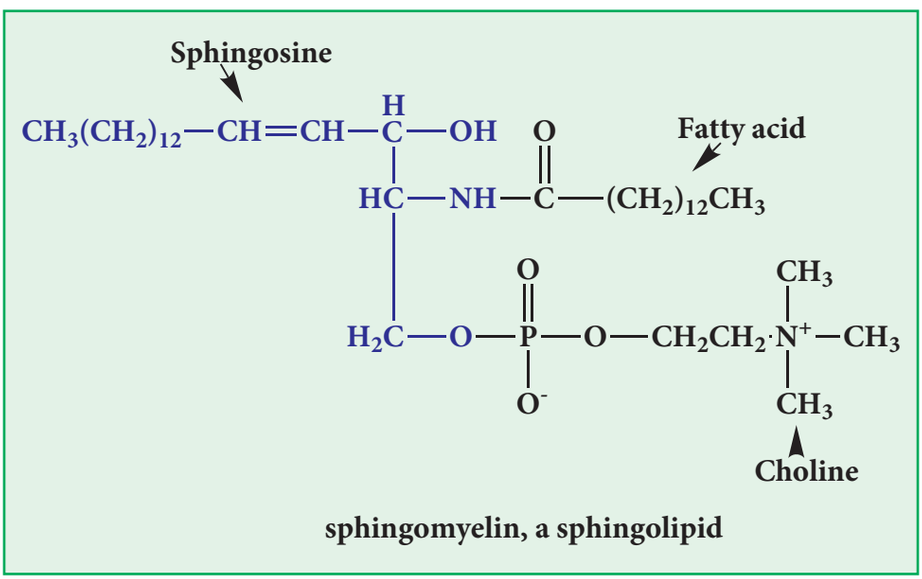

Figure 2.12 Structure of phosphosphingosides
