4. CFC is a pollutant.
5. Light energy may come out due to chemical reactions.

IV. Match the following.

a.

Rusting	Photosynthesis
Electrolysis	Haber's process
Thermolysis	Iron
Food	Brine
Catalysis	Decomposition of limestone

b.

Spoilage	Decomposition
Ozone	Biocatalyst
Tarnishing	Oxygen
Yeast	Chemical reaction
Calcium oxide	Food

V. Answer briefly.

1. Define a chemical reaction.
2. Mention the various conditions required for a chemical reaction to occur.
3. Define catalysis.
4. What happens when an iron nail is placed in copper sulphate solution?
5. What is pollution?
6. What is tarnishing? Give an example.
7. What happens to the brine during electrolysis?
8. On heating, calcium carbonate gives calcium oxide and oxygen. Is it an exothermic reaction or an endothermic reaction?
9. What is the role of a catalyst in a chemical reaction?
10. Why photosynthesis is a chemical reaction?

VI. Answer in detail.

1. Explain the environmental effects of chemical reactions?
2. Explain how food items are spoiled by chemical reactions?
3. Explain any three conditions that is required for a chemical reaction to take place. Give example.

VII. Higher order thinking questions.

1. Explain the role of yeast in making cakes and buns in a bakery?
2. Burning of fossil fuels is responsible for global warming. Justify the statement.
3. Discuss how acid rain occurs due to emission of smoke from vehicles and industries?
4. Is rusting good for iron materials? Explain.
5. Do all the fruits and vegetables undergo browning? Explain.
6. Classify the following day to day activities based on chemical reactions by physical contact, solutions of reactants, heat, light, electricity and catalyst.

   a) Burning of crackers during festivals

   b) Fading of coloured clothes on drying under sunlight.

   c) Cooking of eggs.

   d) Charging of batteries.

VIII. Value Based Questions.

1. Kumar is going to build a house. To purchase the iron rods required for construction, he visited an iron and steel shop nearby. The seller showed him some iron rods which are fresh and good. He also showed him little older iron rods which are brownish in appearance. The price of fresh rods is more than the older ones. The seller also gave some offer to older ones. Kumar's friend Ramesh advised him not to buy the cheaper rods.

   a) Is Ramesh right in his suggestion?

   b) Could you explain the reason for his suggestion?

   c) What are the values shown by Ramesh?
